

IT'S A FACT CPR saves lives!

EACH YEAR IN THE U.S., MORE THAN

395,000 PEOPLE

SUFFER SUDDEN CARDIAC ARREST

Fewer than 6% of sudden cardiac arrest victims survive*

WHAT HAPPENS WHEN
YOU STOP BREATHING?
WITHOUT OXYGEN

4 Permanent
brain damage
MINUTES: sets in

8-10 Brain death
MINUTES: can occur

When CPR is provided immediately after sudden cardiac arrest, a victim's chance of survival can

DOUBLE or TRIPLE

Before you start

1. Check for responsiveness

- Tap the shoulder and shout, "Are you OK?"

2. If victim isn't breathing or only gasps occasionally, contact emergency services

- If others are nearby, have someone call 911
- If you are alone, call 911, provide details and begin CPR
- Lay the victim on their back and kneel next to their head and shoulders

CPR for adults and children 9 and older

If not breathing or only gasping:

Position

Keep your elbows straight and position your hands one on top of the other in the center of the chest

Give 30 rapid chest compressions

To a depth of at least 2 inches, at a rate of at least 100 per minute. Let the chest rise completely after each compression

Tilt the head and lift the chin

Give 2 rescue breaths

Each lasting 1 second

Continue cycle of 30 compressions and 2 rescue breaths until:

- Victim wakes up
- An AED is brought to the scene and is ready to use
- Professional help arrives and takes over

CPR for young children and infants

If not breathing or only gasping:

Position

INFANTS TO AGE 1

Position first two fingers of one hand just below the nipple line

YOUNG CHILDREN

Position one or two hands in the center of the chest

Give 30 rapid chest compressions

Let the chest rise completely after each compression

INFANTS TO AGE 1 & YOUNG CHILDREN

Press down 1/3 of the chest's depth, at a rate of at least 100 per minute

Tilt the head and lift the chin

Give 2 rescue breaths

INFANTS TO AGE 1

Make a complete seal over the mouth and nose, then give 2 rescue breaths

YOUNG CHILDREN

Pinch the nose shut and make a complete seal over the mouth, then give 2 rescue breaths

Continue cycle of 30 compressions and 2 rescue breaths until:

- Victim wakes up
- An AED is brought to the scene and is ready to use
- Professional help arrives and takes over

Compression-only CPR

If the rescuer is unable or unwilling to provide rescue breaths,

compression-only CPR can be performed at the rate of at least 100 compressions per minute
