

STAYING HYDRATED ON THE JOB

4 KEYS: PREPARE, WATER, REST, SHADE

- **CHECK** the heat forecast for the day and prepare
- **WEAR** clothes and protective gear to keep you cool
- **CONSIDER** water-dampened or reflective clothing, cooling vests
- **WEAR** sunscreen and sun-shading hats when possible
- **KEEP** water nearby and drink small amounts often; Try to drink a cup of water every 15 minutes
- **TAKE** scheduled rest breaks in air-conditioned or cool, shaded areas
- **REMOVE** unneeded protective equipment while on break
- **BE A “BUDDY”**— watch for co-workers’ heat-related illness symptoms

Call 911 immediately for heat-related illness (HRI) and give first aid until the ambulance arrives.

FACTS

Dehydration Can Happen Anywhere

HRIs are not exclusive to people working outdoors — many indoor workers are exposed to extreme heat, leaving them susceptible to dehydration and heat stress.

Dehydration Symptoms

- Thirst
- Fatigue
- Muscle cramps
- Headache
