

Winter Driving: Take it

S L O W

Stop speeding:

Slow down and increase following distances

Learn about safety technologies:

Certain technologies like adaptive headlights, electronic stability control, and anti-lock brakes can help

Outfit your vehicle:

Have an emergency kit in the trunk and check your tires to ensure proper tread depth for winter weather driving

Wipe everything off:

Get all the snow and ice off your car—even the roof before you drive—and clean off your windshield, mirrors and sensors

Get to your destination safely.
